ABSTRACT

The purpose of this study was to determine the effects of Maintaining Teaching Effectiveness, a staff development model, upon public school educators' attitudes toward various professional and personal factors. The techniques used for the project included a collegial support network and peer coaching. A total of 24 educators participated from November 1987 to May 1988. At the beginning and again at the conclusion of the study, attitude inventories were administered to all participants. Attitude surveys were also administered to students to determine their perception of their teachers' effectiveness. The mean scores of pretests and posttests were compared to determine the projects' effectiveness. The results indicated that the teachers were improving in their performance of the objectives of the program as indicated by the gain in posttest scores as compared to pretest scores. The program appears to have been effective in improving teacher attitude, enhancing collegial support, and in increasing the students' perception of their teachers' effectiveness. Statistical data from the study are included as well as a copy of the survey questionnaire.

ABSTRACT

The purpose of this study was to determine the effects of Maintaining Teaching Effectiveness, a staff development model, upon public school educators' attitudes toward various professional and personal factors.

A total of 24 educators participated from November 1987 to May 1988. At the beginning and again at the conclusion of the study, attitude inventories were administered to all participants. Attitude surveys were also administered to students to determine their perception of their teachers' effectiveness. The mean scores of pretests and posttests were compared to determine the project's effectiveness.

The results indicated that the teachers were improving in their performance of the objectives of the program as indicated by the gain in posttest scores as compared to pretest scores. The program appears to have been effective in improving teacher attitude, enhancing collegial support and in increasing the students' perception of their teachers' effectiveness. All results were significant at levels that were less than .0008.

BACKGROUND OF THE PROBLEM

Professional mortality is eroding both the number and the quality of our nation's teachers. In an unprecedented fashion, the once revered teaching profession is now the target of potshots from sources as varied as the media, the U.S. Department of Education, social critics, and justifiably concerned parents. Combined with the inherent stress of the job, these factors cause approximately 50 percent of teachers to leave the profession within five years. Further, Stone (1987) reveals that among the first to leave are the most academically able.

What can be done to stop the mass exodus of the "best and brightest?" What help can be given to those who are struggling on the frontlines in our classrooms? Rodriguez and Johnstone (1986) remind us that "teaching can be a very lonely profession." As any strategist knows, a single soldier can never win the entire war. Just as the G.I. in the foxhole receives assistance, supplies, and guidance from an entire support network, so should the teacher be revitalized, encouraged and challenged by a similar system.

One of the most effective methods of providing that system seems to be through a collegial support group. Within the confines of such a group, teachers could begin to think of one another as resources (Bang-Jensen, 1986) and learn by sharing their successes and failures with one another (Westcott, 1987). Colleagues, according to Alfonson and Goldsberry (1982), have "the value of proximity, immediacy and a first-hand knowledge of the other's workspace." Who, then, could be better equipped to help teachers maintain their current levels of effectiveness and challenge them to strive for higher levels than fellow

teachers?

Unfortunately, administrators sometimes "fail to recognize the considerable knowledge and expertise in their own teaching staffs" (Westcott, 1987). As a result, many inservice programs are one-day sessions which Smith-Westberry and Job (1986) believe are viewed by teachers as "disorganized, dull and irrelevant to their needs." In addition, Rodriguez and Johnstone (1986) note that teachers resist having others "diagnosing and prescribing for them." Perhaps the worst failure of these inservice efforts is the lack of any follow-through (Van Cleaf & Reinhartz, 1984). Obviously, real growth is more probable through a program that offers "follow-up practice, coaching and peer support" (Rodriguez & Johnstone, 1986). The solution, then, would appear to be some type of collegial group.

Among the different approaches under the broad spectrum of peer collaboration, "coaching" is the one selected for this Mount Vernon study. Coaching, as defined by its originators, Joyce and Showers (Servatius & Young, 1985), is "close follow-up by a supportive advisor who helps a teacher correctly apply skills learned in training." Servatius and Young were responsible for establishing a pilot program in Santa Clara County, California, through the Educational Development Center, which offers programs to 33 local school districts. The most productive outcome of the successful first year was that "teachers who receive both training and coaching are implementing the trained skills correctly and consistently" (1985, p. 53). This contention is supported by others, including Martin Brooks (1985) who states that "peer teaming and peer observation are critical" to the implementation and success of the Cognitive Levels Matching Project in Shoreham, New York. Additionally, Van Cleaf and Reinhartz (1984) claim that the success of their

"Perceivers and Non-Perceivers" program is largely due to the members of the teams coaching one another.

Coaching is, ideally, an on-going process of teachers coaching or training one another (Showers, 1985). It provides a uniquely individualized form of instruction which provides the advantage of being both emotionally and professionally supportive (Stone, 1987). In fact, Showers (1985) says that coaching has several purposes:

1. To build a community of teachers who continuously engage in the study of their craft.
2. To develop the shared language and set of common understandings necessary for the collegial study of new knowledge and skills.
3. To provide a structure for the follow-up to training that is essential for acquiring new teaching skills and strategies.

Although the presentation of every new skill begins with an assigned, trained coach, each team member, by the latter development of a skill, is able to be both coach and student. Through the process of coaching, teachers are brought to a point of collaboration and sharing, which, according to Bang-Jensen (1986), is an "effective, efficient way to improve instruction and to encourage teacher growth." Confidence, both in themselves and in the support group, inevitably begins to have a positive effect on teachers' performances in the classroom and on their attitudes toward teaching and the educational environment.

Servatius and Young (1985) offer possible reasons for the success of coaching. The first is accountability, the fact that collegial support and commitment is in the same building, not in the central office. Second, support and companionship develop among the team members, extending beyond the learned skill. Third, specific feedback is

offered so participants are encouraged in correct skill implementation and helped with observed difficulties.

In response to a survey of inservice education, one consultant reported that his most successful results came from "continuous work with a school" (Tomlinson, 1986).

STATEMENT OF THE PROBLEM

General statement of the problem: How can the effectiveness of experienced teachers be enhanced?

Specific statement of the problem. Will the Maintaining Teaching Effectiveness program enhance, both personally and professionally, the attitudes and perceptions of the participants and their students' opinions of them?

Hypotheses: Following are the six hypotheses needed to test the effectiveness of the Maintaining Teaching Effectiveness program.

- 1) Maintaining Teaching Effectiveness participants will show increases in scores on an instrument which measures levels of concern.
- 2) Maintaining Teaching Effectiveness participants will show increases in scores in feeling tone.
- 3) Maintaining Teaching Effectiveness participants will show increases in scores on an instrument which measures interest.
- 4) Maintaining Teaching Effectiveness participants will show increases in scores on an instrument which measures success.
- 5) Maintaining Teaching Effectiveness participants will show increases on an instrument which measures knowledge of results.

- 6) Maintaining Teaching Effectiveness participants will show increases on an instrument which measures rewards.
- 7) Maintaining Teaching Effectiveness participants will show increases on an instrument which measures the total of sections (1-6) on the attitude measure.
- 8) Elementary students of Maintaining Teaching Effectiveness participants will rate their teachers' effectiveness as adequate or above.
- 9) Secondary students of Maintaining Teaching Effectiveness participants will rate their teachers' effectiveness as adequate or above.

METHOD

Subjects. Twenty-four (24) professional educators participated in the training program. All were employed by the Metropolitan School District of Mount Vernon. All participants were experienced teachers and most were above average in enthusiasm and desire to improve.

Treatment. All subjects attended regular sessions of the Maintaining Teaching Effectiveness program. They were instructed by a cadre of teachers who had previously completed the training

Assessment. Subjects were tested at the beginning and the conclusion of the training. Students of the participants were similarly tested. The following affective measures were used to measure progress.

#	Measurement	Items	Type GF Instrument
1	Level of Concern	9	Likert
2	Feeling Tone	12	Likert
3	Interest	12	Likert
4	Success	15	Likert
5	Knowledge of Results	7	Likert
6	Reward	7	Likert
7	Total of (1-6)	62	Likert
8	Elementary students' perception of their teachers	25	Likert
9	Secondary students' perception of their teachers	36	Likert

Tests were machine scored. All measures have yielded reliabilities of .90 or above. Examples of each of the scales and the frequencies of responses are contained in Appendix B of this report.

Analysis. Summary results were analyzed by a one-tailed pooled t-test. The Statistics with Finesse statistical packing was used to perform the statistical calculation. Results were tested at the .05, .01, .001, and the .0001 levels.

The t-test was used to ascertain whether there was a difference between the means of the pretests and the posttests for each of the dependent variables.

Pooled t-tests were also performed on the pre- and post-inventories which measured the students' perception of their teachers' effectiveness.

If Maintaining Teacher Effectiveness is an effective staff development program, then the attitude and beliefs of participating teachers

and their students should improve significantly.

RESULTS

Complete results are contained in Appendix A of this report. A summary of the results is contained in Table I. Tables II-VIII contain the pretest and posttest scores from program participants. Tables IX and X contain the frequency of response from students whose teachers participated in the project. From the tables, it can be observed that participants achieved gains that were highly significant. Furthermore, teachers also were perceived as having improved by elementary and secondary students. All tests of statistical significance give evidence of the magnitude of the difference between the pretest and posttest gains that were demonstrated by both the teachers and their students.

It is a fair generalization that all measures demonstrated that the project attained its goals in that both teachers and students perceive that instructional tasks have improved in a manner that the project attempted to encourage. The magnitude of the statistical significance of the gains on all of the measures is from .0008 to .0001.

Table I
Summary Statistics from Questionnaire
Results

Instrument	Pretest Mean	Pretest Standard Deviation	Posttest Mean	Posttest Standard Deviation	t	Significance
<u>Educators (n = 38)</u>						
Level of Concern	31.4	4.5	34.5	4.9	3.85	.0005
Feeling Tone	43.8	6.6	47.2	6.9	3.36	.0001

Secondary (n = 91)	147.7	19.3	152.1	18.5	7.9	.0001

DISCUSSION

This study sought to demonstrate the effectiveness of a project called Maintaining Teaching Effectiveness for the improvement of teacher morale and teacher and student attitudes toward teaching effectiveness. The particular techniques used for this project included a collegial support network and coaching. The results were positive. Both teachers and students had increases between all pre- and posttest measures that were highly significant.

The hope for a project such as Maintaining Teaching Effectiveness are not only the short term gains, but the long term effects. If such a project is continually practiced within the school system not only teacher effectiveness but also teacher retention will be greatly improved.

Additionally, if students perceive their teachers as effective, potentially more learning may occur and the value of the teaching profession may increase in the public eye.

To determine the possibility and validity of such gains for schools, more studies need to be conducted. Once a Maintaining Teaching Effectiveness project is implemented, it should be maintained and follow-up studies should be conducted to determine the long-term effects of this project.

5. My teacher gives me help when I need it.

Most of
the time : Often : Sometimes : Seldom : Never

6. My teacher shows me that he/she is pleased when I do well.

Most of
the time : Often : Sometimes : Seldom : Never

7. My teacher praises me when I answer questions correctly or do well on classwork.

Most of
the time : Often : Sometimes : Seldom : Never

8. My teacher respects me.

Most of
the time : Often : Sometimes : Seldom : Never

9. When I do really good work on an assignment, my teacher tells me exactly what is good about my work.

Most of
the time : Often : Sometimes : Seldom : Never

10. My teacher is interested in what I do outside of school.

Most of
the time : Often : Sometimes : Seldom : Never

11. The work we do for our class isn't too hard and it isn't too easy.

Most of
the time : Often : Sometimes : Seldom : Never

12. When I am having trouble answering a question, my teacher gives me clues to help me get the answer.

Most of
the time : Often : Sometimes : Seldom : Never

13. My teacher listens to me when i talk to her/him, even when she/he is busy.

Most of
the time : Often : Sometimes : Seldom : Never

14. My teacher likes me.

Most of
the time : Often : Sometimes : Seldom : Never

15. If I choose to break my teacher's rules, I know what the consequences will be.

Most of
the time : Cften : Sometimes : Seldom : Never

16. Homework and class assignments are reasonable in length.

Most of
the time : Often : Sometimes : Seldom : Never

17. I am responsible for my behavior.

Most of
the time : Often : Sometimes : Seldom : Never

18. I am responsible for getting my classwork done.

Most of
the time : Often : Sometimes : Seldom : Never

19. Students must be actively involved in the class. We can't just sit and listen.

Most of
the time : Often : Sometimes : Seldom : Never

20. Our teacher is both firm and flexible.

Most of
the time : Often : Sometimes : Seldom : Never

21. Our classroom is a nice place to be.

Most of
the time : Often : Sometimes : Seldom : Never

22. Our teacher is a warm and caring person.

Most of
the time : Often : Sometimes : Seldom : Never

23. There is laughter and humor in our classroom.

Most of
the time : Often : Sometimes : Seldom : Never

24. Our teacher is enthusiastic about the subject(s) he/she teaches.

Most of
the time : Often : Sometimes : Seldom : Never

25. Our teacher treats us like young adults.

Most of
the time : Often : Sometimes : Seldom : Never

26. Our teacher pays attention to our questions and problems.

Most of
the time : Often : Sometimes : Seldom : Never

27. We do a lot of different things in our classroom.

Most of
the time : Often : Sometimes : Seldom : Never

28. Our teacher is fair, honest, and sincere.

Most of
the time : Often : Sometimes : Seldom : Never

29. Our teacher tries new and creative things to help us learn.

Professional Educator - Self-Evaluation

DIRECTIONS: Please answer these questions about how you feel the instruction in your classroom has changed during the past three months. Please draw a circle around the answer that is most appropriate. (Administrators answer the questions in terms of how they relate to participants of this program that are teaching at their school.)

1	2	3	4	5
I Never Do This	Decreased	Stayed the same	Increased	Done Regularly as needed

Level of Concern

- | | | | | | |
|--|---|---|---|---|---|
| 1. Practice activities are reasonable in length. | 1 | 2 | 3 | 4 | 5 |
| 2. Students are accountable for their behavior. | 1 | 2 | 3 | 4 | 5 |
| 3. Students are responsible for doing required work. | 1 | 2 | 3 | 4 | 5 |
| 4. Adjustments are made (up and down) according to student's anxiety levels. | 1 | 2 | 3 | 4 | 5 |
| 5. Students are active participants in the learning process rather than passive listeners. | 1 | 2 | 3 | 4 | 5 |
| 6. Negative reinforcement is used effectively. | 1 | 2 | 3 | 4 | 5 |
| 7. There are reasonable standards for the quality and quantity of work. | 1 | 2 | 3 | 4 | 5 |

8. The anxiety level of students who "cop out" during learning is raised. 1 2 3 4 5

9. A fine line is maintained between firmness and flexibility. 1 2 3 4 5

Feeling Tone

10. Comments are made to students about their appearance, interests, problems, and activities. 1 2 3 4 5

11. Students know that the teacher wants to help them learn. 1 2 3 4 5

12. A warm, caring manner is conveyed. 1 2 3 4 5

13. Positive reinforcement is used with individual students and with the class as a whole. 1 2 3 4 5

14. The classroom possesses a pleasant ambience. 1 2 3 4 5

15. There is laughter and a sense of humor. 1 2 3 4 5

16. Attention is paid to students' questions and problems. 1 2 3 4 5

17. A sense of enthusiasm for the subject(s) is conveyed. 1 2 3 4 5

18. Time is allowed for effective interaction as well as for academics. 1 2 3 4 5

19. Nonverbal clues are used to make students more comfortable (body language, facial expressions, etc.) 1 2 3 4 5

20. Students are treated as young adults. 1 2 3 4 5

21. Fairness, honesty, and sincerity are emphasized. 1 2 3 4 5

Interest

22. The classroom routine is varied from day to day. 1 2 3 4 5

23. Students are encouraged to share relevant experiences. 1 2 3 4 5

- | | | | | | |
|--|---|---|---|---|---|
| 24. All three learning modes (visual, auditory, and kinesthetic) are incorporated into teaching. | 1 | 2 | 3 | 4 | 5 |
| 25. The class period is divided into segments of different activities. | 1 | 2 | 3 | 4 | 5 |
| 26. Novelty, anecdotes, creativity (even gimmicks) are used to make the lessons colorful and varied. | 1 | 2 | 3 | 4 | 5 |
| 27. A variety of instructional activities are used. | 1 | 2 | 3 | 4 | 5 |
| 28. Students' names are mentioned whenever possible. | 1 | 2 | 3 | 4 | 5 |
| 29. Students' interests (music, cars, sports, etc.) are used as examples. | 1 | 2 | 3 | 4 | 5 |
| 30. Students have a voice in what they will learn and how they will learn it. | 1 | 2 | 3 | 4 | 5 |
| 31. Learning is related to students' lives and personal experiences. | 1 | 2 | 3 | 4 | 5 |
| 32. A variety of visual techniques is used. | 1 | 2 | 3 | 4 | 5 |
| 33. Lessons are made stimulating through anecdotes, humor, gestures, etc. | 1 | 2 | 3 | 4 | 5 |

Success

- | | | | | | |
|--|---|---|---|---|---|
| 34. Letter grades are <u>not</u> placed on practice papers. | 1 | 2 | 3 | 4 | 5 |
| 35. Students know the objective/purpose of each lesson. | 1 | 2 | 3 | 4 | 5 |
| 36. Students give active participation and feedback. | 1 | 2 | 3 | 4 | 5 |
| 37. Each students' work is at the appropriate level of difficulty for him or her. | 1 | 2 | 3 | 4 | 5 |
| 38. Students are provided with a clear model of how to use a particular problem or activity. | 1 | 2 | 3 | 4 | 5 |

- | | | | | | |
|---|---|---|---|---|---|
| 39. No assumptions are made about what students already know before instruction begins. | 1 | 2 | 3 | 4 | 5 |
| 40. Lessons are carefully planned ahead of time. | 1 | 2 | 3 | 4 | 5 |
| 41. Small segments of content are taught. | 1 | 2 | 3 | 4 | 5 |
| 42. As a lesson progresses, students are checked to see if they are understanding it. | 1 | 2 | 3 | 4 | 5 |
| 43. Instruction does <u>not</u> jump from one topic to another. | 1 | 2 | 3 | 4 | 5 |
| 44. There is one clear objective for each lesson. | 1 | 2 | 3 | 4 | 5 |
| 45. Short, regular practice sessions on basic skills and concepts are provided. | 1 | 2 | 3 | 4 | 5 |
| 46. Clear directions are given. | 1 | 2 | 3 | 4 | 5 |
| 47. A sense of organization, competence, and efficiency is conveyed to students. | 1 | 2 | 3 | 4 | 5 |
| 48. Practice on new material is carefully monitored. | 1 | 2 | 3 | 4 | 5 |

Knowledge of Results

- | | | | | | |
|--|---|---|---|---|---|
| 49. Feedback to students is as specific as possible. | 1 | 2 | 3 | 4 | 5 |
| 50. Written assignments are checked and returned quickly. | 1 | 2 | 3 | 4 | 5 |
| 51. Students' work is commented on in specific terms. | 1 | 2 | 3 | 4 | 5 |
| 52. Immediate feedback is provided whenever possible. | 1 | 2 | 3 | 4 | 5 |
| 53. Students check their own papers when it is appropriate. | 1 | 2 | 3 | 4 | 5 |
| 54. Students check each others' papers when it is appropriate. | 1 | 2 | 3 | 4 | 5 |
| 55. In grading, more information is provided than just a letter grade. | 1 | 2 | 3 | 4 | 5 |

Reward

- | | | | | | |
|--|---|---|---|---|---|
| 56. Verbal or written recognition is given to work that is well done. | 1 | 2 | 3 | 4 | 5 |
| 57. Students may work with partners of their own choice when it is appropriate. | 1 | 2 | 3 | 4 | 5 |
| 58. Students have free choice time when it is appropriate. | 1 | 2 | 3 | 4 | 5 |
| 59. Students who are very diligent are freed from homework assignments for a day or two. | 1 | 2 | 3 | 4 | 5 |
| 60. Extrinsic rewards are used when necessary. | 1 | 2 | 3 | 4 | 5 |
| 61. The love of learning is instilled in students. | 1 | 2 | 3 | 4 | 5 |
| 62. An organized system of reinforcement is utilized. | 1 | 2 | 3 | 4 | 5 |
